EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Engineering – CGPA: 8.93

2022 – 2026

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL

Machine Learning: Scikit-learn, Pandas, NumPy, Supervised Learning, Feature Engineering, Data Preprocessing, Model Evaluation, Classification

Generative AI: LLaMA, Whisper, Natural Language Processing (NLP), Transformers, Prompt Engineering

Frameworks & Databases: Flask, Gradio, MongoDB Atlas, REST APIs

Tools: Git, GitHub, Linux, VS Code

PROJECTS

WebGuard | *Python, Pandas, NumPy, Flask, scikit-learn, MongoDB Atlas* Sep 2025 – Nov 2025

- Built a supervised machine learning classifier to detect malicious and legitimate websites using **30+ security and behavioral features**, improving phishing detection accuracy by **89%**.
- Engineered a scalable ETL pipeline with MongoDB Atlas, processing and validating **10,000+ website records** for model training and inference.
- Reduced false-positive predictions by **18%** through feature engineering, cross-validation, and hyperparameter tuning techniques.
- Deployed a Flask-based REST API capable of handling **500+ prediction requests/day** with an average response latency below **200 ms**.

CustomerChurnPredictor | *Python, scikit-learn, Pandas, NumPy* Jul 2025 – Aug 2025

- Developed a machine learning solution to predict customer churn using **20+ demographic and service-related features**.
- Preprocessed and transformed **7,000+ customer records**, improving model reliability and reducing missing-data issues by **25%**.
- Compared **3 classification algorithms** including Logistic Regression, Random Forest, and Gradient Boosting to identify the best-performing model.
- Achieved **88% accuracy** and **0.91 ROC-AUC score**, evaluated using precision, recall, F1-score, and confusion matrix analysis.

MediAssist | *Python, Gradio, Groq, Whisper, LLaMA* Feb 2025 – Apr 2025

- Developed an AI-powered medical assistant supporting multimodal interactions and trained on **1,000+ curated medical samples**.
- Integrated LLaMA-based reasoning and Whisper speech recognition, achieving over **90% speech-to-text accuracy**.
- Deployed inference workloads on Groq infrastructure, reducing average response latency by **35%**.
- Optimized backend workflows to support **200+ concurrent users** while maintaining reliable real-time performance.

EXTRA-CURRICULAR

- Awarded Player of the Tournament among 60+ participants in an inter-college cricket championship for scoring 280+ runs and taking 15 wickets.
- Led a 15-member team as Tech Lead of the Mozilla FireFox Club, organizing 10+ workshops and mentoring 20+ juniors in web development and open-source contributions.
